 - We have a BSC Scan API account if needed
- Get Total number of transactions for the token for selected period (1 day, 1week, 1month, 1year)
 - Get total number of buys
 - Get total number of sells

4. We have a rewards pool function (unique to our token) Get more information here:
<https://www.youtube.com/watch?v=p7BFKs1oiZk>
 - a. Get tokens and balances from wallet
 - i. 0x502d5b43a66cf8382f5a65dadfac163afd5f106a
 - b. DO NOT Show SPAM Tokens
5. Get Wallet 0x BBTF Balance USD
6. Get Total Number of BBTF Held
7. Get Holder Position out of total holders
8. Get Holder Distribution for token
 - a. Example: <https://safemoonglubiz.com/Whales>
9. In the protocol both buys and sells have a 2% fee that is directly added to LP
(<https://bbtftoken.com/wp-content/uploads/2022/11/BBTF-PROTOCOL-1.png>)
 - a. You can listen for the Add Liquidity ETH method.
10. In the protocol, we collect 2% fee that collects each token rewarded by the protocol.
Tokens are collected at the address:
0x502d5B43A66CF8382F5A65DaDfAC163AFd5F106a
 - a. But a couple of things here. Some tokens reflect in BUSD, BBTC, BXR, P,
 - i. These require the Swap Exact ETH function to convert the rewarded token to BNB.
 - ii. Once the gas threshold is reached on BNB, half of the bnb is used to purchase BBTF and the other half is kept as BNB. Then the Add Liquidity ETH method is triggered.
11. This wallet collects staking rewards from volume. Its 3% of total sell volume.
 - a. (0x346d3558974b6e387F94d5D2383c7bb78d2AA0a8) Get balances from staking contract
